"Standard Quality Millwork"

LUMBERMEN, ARCHITECTS, HOME BUILDERS, and CONTRACTORS, in fact all those interested in finer buildings, recognize that MILLWORK is the main essential in the construction of a building, and to realize that satisfactory MILLWORK can be had only through proper selection of raw materials, a keen knowledge of production, as well as ability to select, and express individuality of design.

STANDARD QUALITY, characteristic in itself, is backed by an organization of men who have had vast experience in the production of Millwork. Quality and service are the predominating factors supreme in the minds of these men devoting their efforts to maintain for you a standard of excellence surpassed by none.

In your behalf we submit this catalogue and price guide to be used by you as a ready reference and cost indicator to assist you in the selection of beautiful and permanent millwork.

HOLLOW AXLE SASH PULLEY JAM PROOF

This Pulley has a wheel designed for either chain or cord. Rolled back edges on both front and back opening. Face plate housing fits regular plough in stock sash. Bottom of housing in weight box extends squarely into box so that weight strikes this part if jerked instead of the box or wheel of ordinary pulleys which prevents any chance for damage. Hollow axle with two-inch wheel provides extra large bearing which reduces friction as weight is distributed over greater area and insures a self-centering wheel. Face plate, $1\frac{1}{8}'' \times 4\frac{1}{2}''$. No. 7 screw.

Regularly furnished in the mahogany finish unless otherwise specified.

“A Home is No Finer than its Interior”

HE colossal effect of any Home is that dignified expression of sublime comfort and harmony, created through rare judgment and selection of materials of which it is constructed.

What greater beauty can be extoled to grace the Interior of the Home than Nature's finest gift to mankind—"Wood"—developed by expert craftsmen into "Artistic Doors" of Immortal Beauty.

A major unit in the construction of the Home is the Doors. On the following pages are illustrations of various Designs of Exterior and Interior Doors manufactured from the finest Cabinet Woods, and when finished in their Natural Veneers, depict a Potential Charm of Grace and Beauty.

To give the Home that inimitable degree of Prestige,

**“SELECT YOUR DOORS AS YOU
WOULD YOUR FURNITURE.”**

MIRROR DOORS

Design S-108

The reverse side of our Mirror Door is paneled to exactly match the other interior doors of the home.

Mirrors (either plain or beveled edge) set flush with stiles and held firmly in place by neat glass moulding.

To arrive at cost of Mirror Doors (either plain or bevel plate mirror), add to the price of any paneled door as follows.

N-800 Design

Price of Mirrors shown are for Panels only. If full size mirror desired use prices for Panels as follows.

N-800 Design		Other Design	
Price	Price	Price	Price

Mortise and Tenon Construction

BELOW is cut showing the Mortise and Tenon Joint used in our Garage doors. This joint is not only glued but is still further reinforced by steel dowel pins, instead of small wooden pins, holding these doors together. Note the wide tenon, giving ample glue surface and then reinforced with steel.

DETAILS of construction like these are what make your doors serve you faithfully for years after price is forgotten. It costs no more to have the best.

STANDARD QUALITY FIR FRAMES

The superiority of Standard Quality Old Growth Douglas Yellow Fir outside window and door frames is clearly proven, by facts and figures. The following chart is a reproduction of one prepared and compiled by The Forest Products Laboratory, Madison, Wisconsin. This chart demonstrates comparative values of the various woods generally used in the manufacture of outside Frames. Tensil strength, durability and decay resistant capacities, main and essential features of good quality frames, have been taken into consideration.

ALLOWABLE STRESS

Species	Bending		Com- pression perpen- dicular to grain	Com- pression parallel to grain	Average value for modulus of elasticity	Decay resist- ance
	In ex- treme fibre	Hori- zontal shear				
	Pounds per square inch					
Douglas Fir	1,600	90	345	1,175	1,600,000	75-100
Pondosa	900	85	250	750	1,000,000	35- 50
White Pine...	900	85	250	750	1,000,000	70- 90
Redwood	1,200	70	250	1,000	1,200,000	125-175
Cypress { Louisiana }	1,300	100	350	1,100	1,200,000	125-175
Red }						

All parts of our Standard Quality Frames are well manufactured from edge grain, soft texture, properly kiln dried Douglas Fir which eliminates the great hazard of slivers, raised grain, warped or twisted pulley stiles and enhancing the value of the frames to the same extent that edge grain flooring exceeds the value of flat grain flooring. We offer our frames with the confidence and assurance that you will be entirely satisfied.

CHINA CASES

Design S-81

Corner china cases are practical and convenient. They take up space seldom used for any other purpose and may be built into almost any dining room, no matter how small.

Adopted from the Colonial Architecture, these graceful and dignified designs may be used with equal satisfaction in almost any type interior.

Rough wall opening: $2'7\frac{1}{2}"$ wide, $6'10"$ high, $1'2\frac{3}{4}"$ deep.

Semi-assembled, White Pine. Price.....\$64.25

COMBINATION KITCHEN CABINET

CUSTOM BUILT CABINETS

A Cabinet of this design is an ideal feature for the home, requiring small space for erection but providing ample and convenient compartments for storing all kitchen utensils and other commodities. We specialize in Custom Built or odd Cabinet Work. As kitchen cabinets vary greatly in size and design, send us the required size, together with the widths of room and window opening, ceiling height, size of sink, and height of top of sink from floor. We are so organized in our Cabinet Department that prompt service is assured on any built-in feature. Send us your plans.

STANDARD IRONING BOARD

(SURFACE TYPE)

Design S-15

Made of Clear California Sugar Pine with 3-Ply Fir Panel

Easy to Install. Complete with Hardware Ready to Attach on the Wall
Carton Packed

Price.....\$9.75

MASTERBILT IRONING BOARD

S-I-A

Builders everywhere have recognized the necessity of the built-in Ironing Board. The Standing Type, because it has been in use the longest is the most generally recognized board. In entering this field the Masterbilt Wall Fixture Co. determined to build a board which was so superior to anything else on the market that home builders could not help but appreciate the difference. S-I-A Ironing Board illustrated on this page, is a result of this effort. It sets in 3 inch or 4 inch Stud Wall. As can be seen in illustration at left, all working parts are of metal, absolutely eliminating wear. There is no chance for looseness; on the contrary, the board is always rigid when in use. This ironing board is adjustable to two heights, 2 feet 8 inches and 2 feet 11 inches from the floor. The lower height enables the housewife to iron while sitting down; it also enables people of different heights to set the board at the most satisfactory ironing position—a very important item in apartment houses where different families are moving in and out. S-I-A Board is equipped with a sleeve board. This unit is built so that the board removes from the case. This permits it to be used in another part of the room or house. The board is very easy to open and close, and of course, the pad remains on the board. Set in rough opening 1 foot 2 inches by 6 feet 10 inches—3 inch or 4 inch Stud Wall.

The board proper is made of three pieces of California Sugar Pine, tongue and grooved glue joint and the square end has a large spline, full width. You will not be bothered with split or warped boards if you get Masterbilts.

Price.....\$7.80

MASTERBILT COMBINATION IRONING BOARD AND SPICE CABINET

Design S-6

This combination requires the same amount of wall space used by the Standing Type of Board. The spacious spice cabinet with the asbestos lined, metal covered shelf are added features. The Ironing Board when opened becomes very rigid by the patented feature of the cantilever brace. A special folding hinge allows for thickness of pad and cover when the board is folded.

Price, with pad.....\$17.25
(Carton packed)

FOLDING IRONING BOARDS

S-5

One of the features of the S-5 Ironing Board, most pleasing to housewives is the fact that it will accommodate a thick, generous pad and that it quickly and easily folds up with pad on. Those who have had experience with other boards will greatly appreciate this advantage. The same careful designing which has provided this convenience has perfected the board in other ways, so that it is entirely practical. The ironing surface is perfectly smooth. When closed it is compact, requiring very small space. When extended it offers a big, broad ironing surface which is the delight of every housewife. To extend the board when it is folded, merely pull up on ring. It is non-collapsible and easily installed in Rough Opening 1 foot 2 inches wide; 2 feet 9½ inches high. Fits in 3½ inch Stud Wall.

Price, With Pad.....\$12.75
No Trim or Door Hardware included
